

**Syllabus**  
**Cyber Security and Social Media Analyst**

S No.	NOS/Module Name	Topics	Duration (Hours)		Learning Outcomes
			Theory	Lab	
1	Operating System Basics	<ul style="list-style-type: none"> <li>• Introduction to different types OS, their Installations, Booting process</li> <li>• Learn to use basic command for Linux and windows OS.</li> <li>• Learn to configure basic services Web, DHCP, DNS, Telnet, SSH TFTP</li> </ul>	14	16	<ul style="list-style-type: none"> <li>• Familiarization with the installation process of windows and Linux OS.</li> <li>• Various types of Installations for Linux</li> <li>• Use of Operating System.</li> <li>• How the OS boots and interacts with underlying Hardware</li> <li>• Practice to use various commands on Linux systems.</li> <li>• File related activity, creation, delete, copy, transfer etc.</li> <li>• Learn to understand the role of services in modern systems.</li> <li>• Configure various services so that end users can use those services.</li> </ul>
2	Computer Network	<ul style="list-style-type: none"> <li>• Network basics: Ethernet Fundamentals and Cabling, ISO-OSI Reference Model, TCP/IP Model, Introduction to LAN, MAN, PAN, WAN, WLAN</li> <li>• IP address, Classes, Classless, CIDR, Prefix, FLSP VLSM, IPv6 addressing</li> </ul>	50	70	<ul style="list-style-type: none"> <li>• Learn about network, type of topologies, LAN, WAN Various models TCP/IP and OSI, layers functions, protocols and their role</li> <li>• Try to create a small network.</li> <li>• IP addressing for Ipv4 and IPv6</li> <li>• Assign IP Addresses to LAN devices, Network devices, its classes, subnetting topics VLSM and FLSP, assign IPv6 address to various devices including end hosts and network devices</li> <li>• Configure network devices on command prompt using network device operating system.</li> <li>• Learn to enable telnet and ssh access methods on network devices</li> <li>• Configure neighbour discovery protocol CDP and LLDP to create and</li> </ul>

		<ul style="list-style-type: none"> <li>• Network Device OS CLI command, Booting process of router, Router and switch Hardware, enable telnet and SSH access on Router , CDP, LLDP</li> <li>• Basics of routing and switching, routing classification, Static Routing, Default routing, Dynamic routing RIP, RIP Version2</li> <li>• Types of Switches, installation, configuration, MAC binding, port security on cisco switch, Layer2 security problems and solutions.</li> <li>• Advanced routing protocols EIGRP, OSPF, EIGRP for IPv6 and OSPFv3, theory and configuration and troubleshooting.</li> </ul>		<p>understand network scenario.</p> <ul style="list-style-type: none"> <li>• Configure, verify for static, default routing, RIP, RIPv2 and RIP V3 for IPv6 Networks.</li> <li>• Check router's reading entries in routing table.</li> <li>• Routing table lookup process and next hop selection.</li> <li>• Types of switch, configure Layer2 switches as per requirement.</li> <li>• Types of threats in the network, to mitigate the threats implement layer2 in the switched network.</li> <li>• Assign IP address to layer2 switch as device.</li> <li>• Configure advanced routing protocols like EIGRP, OSPF, and EIGRP for IPv6. OSPFv3.</li> <li>• To verify and troubleshoot the routing protocol for proper functioning.</li> <li>• Configure the access-list to control the traffic passing through the network device and control it using ACLs.</li> <li>• Types of ACLs their configuration and verification.</li> <li>• Control web, Telnet, ssh and FTP traffic using extended ACL</li> <li>• Configure various types of NAT on router.</li> <li>• Check for Internet access after configuring NAT.</li> <li>• Check Nat table.</li> <li>• Troubleshoot NAT, if not working.</li> <li>• Configure FHRP protocol HSRP on router.</li> <li>• Configure VRRP protocol on router</li> <li>• Configure GLBP on router</li> <li>• Configure tracking, change priority</li> <li>• Configure VLAN, Trunk port and access port negotiation protocol DTP,</li> <li>• Configure trunk port and access port.</li> <li>• Configure VLAN trunking protocol IEEE802.1Q on trunk port.</li> <li>• Analyze running spanning tree protocol (STP) on all switches in topology.</li> </ul>
--	--	--	--	--

		<ul style="list-style-type: none"> <li>• Access control Lists, standard ACL, Extended ACL, Named ACL</li> <li>• NAT Concept, RFC1918 Addresses, static NAT, Dynamic NAT, PAT configuration and trouble shooting</li> <li>• Gateway load balancing protocols HSRP, GLBP, VRRP</li> <li>• Switching process, LAN VLAN, DTP, VLAN trunking protocol IEEE802.1Q, VTP, STP</li> <li>• WAN protocols HDLC, PPP, frame relay concepts and configuration</li> <li>• Implement port security on cisco switch, Layer2 security problems and solutions.</li> </ul>			<ul style="list-style-type: none"> <li>• Configure WAN connectivity using following WAN protocols.</li> <li>• Configure PPP, HDLC and frame-relay protocol.</li> <li>• Troubleshoot the issues after configuration.</li> <li>• Secure layer2 switch network by implementing port-security.</li> <li>• Troubleshoot and verify the configuration for its functions</li> <li>• Network monitoring software installation.</li> <li>• Configure network devices to SNMP traps to the SNMP manager.</li> <li>• Logging server installation.</li> <li>• Configure network devices as agent to send logs to the logging server.</li> <li>• Ensure security of the data while sending on the Internet.</li> <li>• Implement site-to-site VPN solution on branch and HQ routers.</li> <li>• Verify and troubleshoot the site-to-site router configuration</li> <li>• Configure NTP server on router.</li> <li>• Configure other devices to derive and synchronise time from NTP server.</li> </ul>
--	--	---	--	--	---

		<ul style="list-style-type: none"><li>• Logging server, SNMP, Bandwidth Management</li><li>• Virtual Private Networks (VPNs), Concepts, Site-to-site VPN configuration, Easy VPN Server. Concept.</li><li>• NTP Server, time synchronization on network configuration</li></ul>			
--	--	---	--	--	--

3	Cyber Security	<ul style="list-style-type: none"> <li>• Information Security: why Information security needed, setup information security in network.</li> <li>• Setting up DB Server, Setting up Proxy server</li> <li>• Linux based Firewall, IPtables, ACLs, etc</li> <li>• Cryptography (Symmetric, Asymmetric)</li> <li>• Information gathering, sniffing, scanning</li> <li>• ARP Cache Poisoning and MITM Attack, IP spoofing, MAC spoofing</li> <li>• DOS &amp; DDOS attack</li> <li>• Accessing remote machine, Privilege Escalation</li> </ul>	36	54	<ul style="list-style-type: none"> <li>• Basic concept Information security.</li> <li>• Techniques to deal with Information Security</li> <li>• Database server installation, working with SQL commands on database, Basic SQL commands.</li> <li>• Setup a proxy server using Linux machine and provide Internet access to other users.</li> <li>• Understand the role of firewall and their needs.</li> <li>• Configure firewall to allow services through the firewall.</li> <li>• Configure ACL for proxy server to deny certain traffic.</li> <li>• Cryptography, encryption concepts.</li> <li>• Popular open crypto algorithms in the Industries.</li> <li>• Best practices and use cases</li> <li>• How hackers collect the information to gain access and how to protect the information</li> <li>• What are the different techniques of attacks and how to defend from these attacks</li> <li>• What is DOS &amp; DDOS attacks and how to defend from these attacks</li> <li>• How hackers gain the access of machines and how to protect from it.</li> </ul>
---	----------------	---	----	----	---

4	Cyber Forensics	<ul style="list-style-type: none"> <li>• Cyber Law &amp; Digital Forensics</li> <li>• Mobile Forensics</li> </ul>	20	10	<ul style="list-style-type: none"> <li>• Indian Cyber Law</li> <li>• Basics of Live Forensics</li> <li>• Basics of Network Forensics</li> <li>• Basics of Internet Forensics</li> <li>• Basics of Disk Forensics</li> <li>• Basics of Memory Forensics</li> <li>• Basics of Multimedia Forensics</li> <li>• Basic idea about potential evidence</li> <li>• Introduction to Mobile Forensics tools used for acquisitions and analysis of evidence</li> </ul>
5	Perception Management	<ul style="list-style-type: none"> <li>• Social media Analysis and Perception Management</li> <li>• Social Media Publications</li> <li>• Social media Analysis and Perception Management</li> <li>• Gathering Social Media data</li> <li>• Social Media Metrics</li> <li>• Analysing Social Media Data</li> <li>• Social Media Monitoring and Reporting</li> <li>• Sentiment Analysis</li> <li>• Social Network Analysis</li> <li>• Challenges in Social Media Analytics</li> <li>• Content Development and Social Media</li> <li>• Psychological Warfare</li> </ul>	50	70	<ul style="list-style-type: none"> <li>• What is perceptual process</li> <li>• What are the perceptual errors</li> <li>• Introduction to Perception Management and its applications in different sectors</li> <li>• Introduction to snippets</li> <li>• WordPress basics</li> <li>• Customization of snippets using WordPress</li> <li>• Web Development &amp; Website Optimization</li> <li>• Social Media Analytics Basics</li> <li>• Basics of Social Media Conversation</li> <li>• Functional building Block</li> <li>• Introduction to the social Media Data gathering tools</li> <li>• What are the social media metrics used in social media platforms</li> <li>• Understanding Various Aspects of Social Media Analytics</li> <li>• Processes and techniques of Analysing Social Media Data</li> <li>• What is Social Media Listening</li> <li>• Introduction to Social Media Monitoring Tools</li> <li>• Evaluating Social Media</li> <li>• Identifying Opinions</li> </ul>

6	Artificial Intelligence/Machine Learning and Disruptive Technologies		10	20	<ul style="list-style-type: none"> <li>AI/ML using python Social Media &amp; AI</li> <li>Windows Server Administration</li> <li>Linux Server Administration (including OS security features)</li> <li>Introduction to Disruptive Technologies (Big Data &amp; Cloud Computing)</li> </ul>
<b>Sub Total = 420 hours</b>			180	240	
7	Employability Skills		60		Students will be able to get the additional skills apart from the technical skills, to be job ready
8	OJT/Project		60		Students will be able to learn the working in a job.
<b>Total Duration</b>			<b>540</b>
